

INCIDENT DETECTION AND RESPONSE FOR A HIGHWAY SYSTEM

CASE STUDY

CHALLENGE

The department of transportation needed a solution to detect incidents on the highway system and respond quickly to minimize the impact on traffic flow.

"For over 10 years, we've been developing new ways to empower businesses with data driven insights."

Our mission is to provide companies with world class traffic analytics solutions that drive business success."

Kripamurti

CEO & Founder

Algolytic Data Solutions

SOLUTION

Algolytic Data Solutions was brought on board to provide a solution that used advanced data analytics techniques to monitor the highway system data in real-time and identify any incidents. Our team of experts used machine learning algorithms to predict the severity of incidents and suggest an optimized response plan.

RESULTS

Our solution significantly improved the department of transportation's incident response times, resulting in a reduction in congestion and an increase in driver safety. The department of transportation was extremely pleased with the results and has since continued to work with Algolytic Data Solutions to further improve the highway system's performance.
